Mississippi Department of Environmental Quality

MISSISSIPPI.gov

MDEQ | EPD | ECED | DID

The Mississippi Department of Environmental Quality (MDEQ) is committed to providing public access to environmental information. Our agency believes that keeping citizens informed enhances achievement of our goal of environmental protection.

The Department's continuing investment in information technology facilitates its mission of environmental stewardship. enSearch Online provides a comprehensive view of MDEQ's regulated community (agency interests) and their activities, by allowing the public access to information about permitting and compliance activities within the scope of MDEQ.

The information contained in **enSearch Online** is obtained from MDEQ's enSite (electronic environmental Site Information System) System used by the Office of Pollution Control's Air Division, Environmental Permits Division and Environmental Compliance and Enforcement Division, and the Office of Geology's Mining and Reclamation Division. The purpose of the system is to support permitting and compliance activities of the Department of Environmental Quality. Regulatory programs that are supported by this database are the Surface Water National Pollutant Discharge Elimination System (NPDES) Program; the Air Title V, Construction and Operating Programs; the Solid and Hazardous Waste Programs; Geology Surface Mining and Reclamation Division; and the Waste Tire Program (the UST program is currently not supported). There are other regulatory programs within the Department that do not currently utilize this database including programs managed by the Office of Land and Water, and the Total Maximum Daily Load (TMDL) Program.

Agency Interest Data

- Agency Interest Search
  Search agency interests by name, city, county, SIC, and basin.
- Mississippi Commercial Waste Tire Haulers
  Commercial haulers certified by MDEQ.
- Mississippi Commission on Environmental Quality Orders Issued
  View orders issued on or after January 1, 2011.

OPC Air Division

- Asbestos Project Search
  View the activities of the Air Division Asbestos Branch. Search by project name, city, county, activity, and date.
- Mississippi Asbestos Abatement Certifications
  Find individuals and firms certified by the Air Division Asbestos Branch.
- Mississippi Lead-Based Paint Certifications
  Find individuals and firms certified by the Air Division Lead-Based Paint Branch.

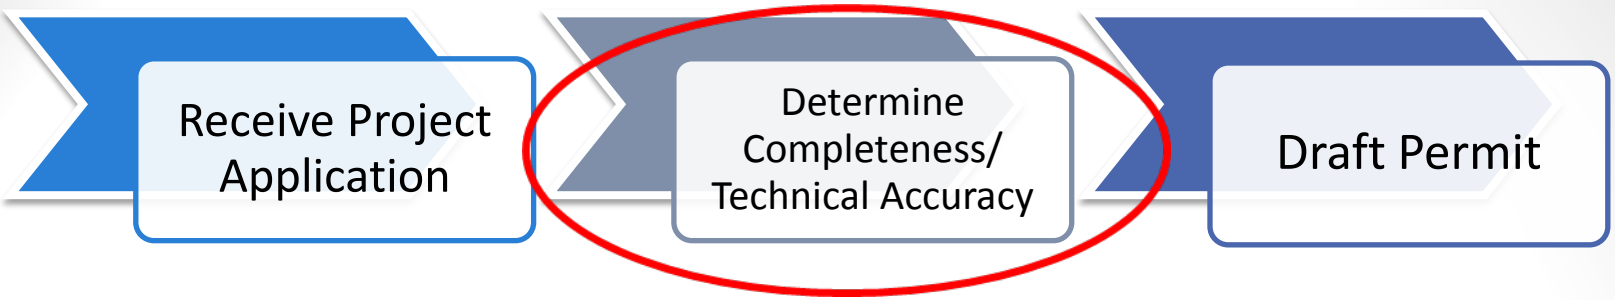
Jackson County Utility Authority, Hurley WWTP, Hurley, MS applied for renewal of their Water State Operating Permit (SOP) on 11/25/2013.

Jackson County Utility Authority, Wade WWTP, Lucedale, MS applied for renewal of their Water State Operating Permit (SOP) on 12/31/2013.

12:13 PM
7/28/2014

- MDEQ evaluates the following:
  - Emissions changes
    - Volatile organic compounds from new tank and piping system
    - Emission changes are small
  - Applicable regulations
    - Tank is subject to EPA storage tank regulations
    - Piping system subject to EPA equipment leak regulations



- MDEQ makes following determination:
  - No construction permit needed because emissions meet “de minimis modification” definition
  - Minor modification to operating permit needed to add applicable EPA regulations in the Title V permit
- A notification of the complete application is sent to EPA and surrounding States

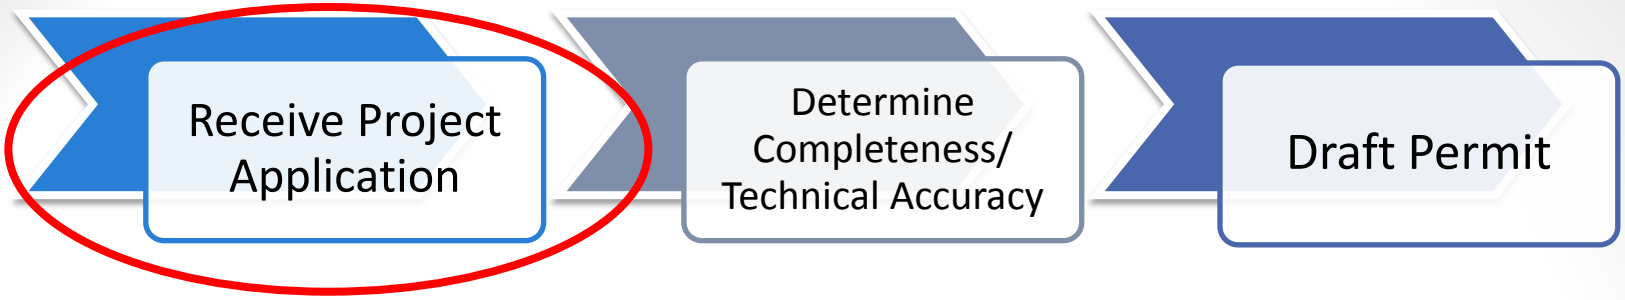
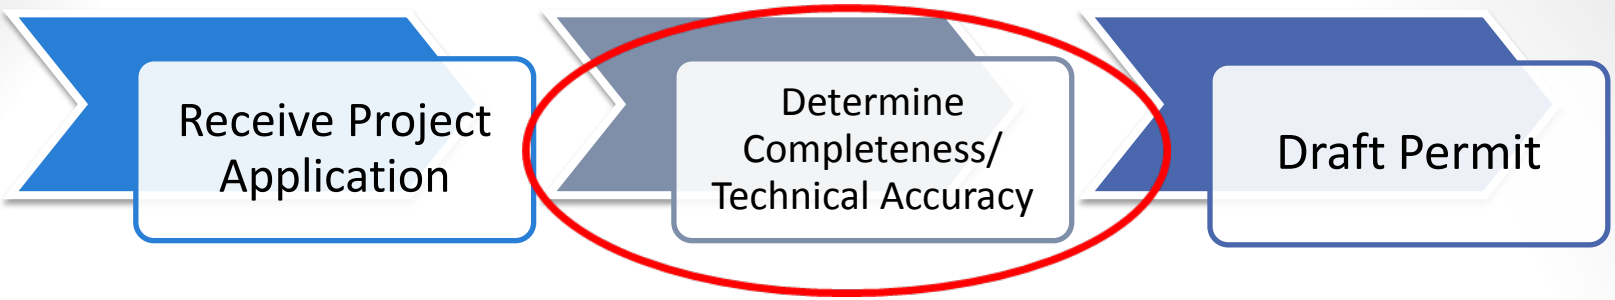
Example #2
Significant Modification

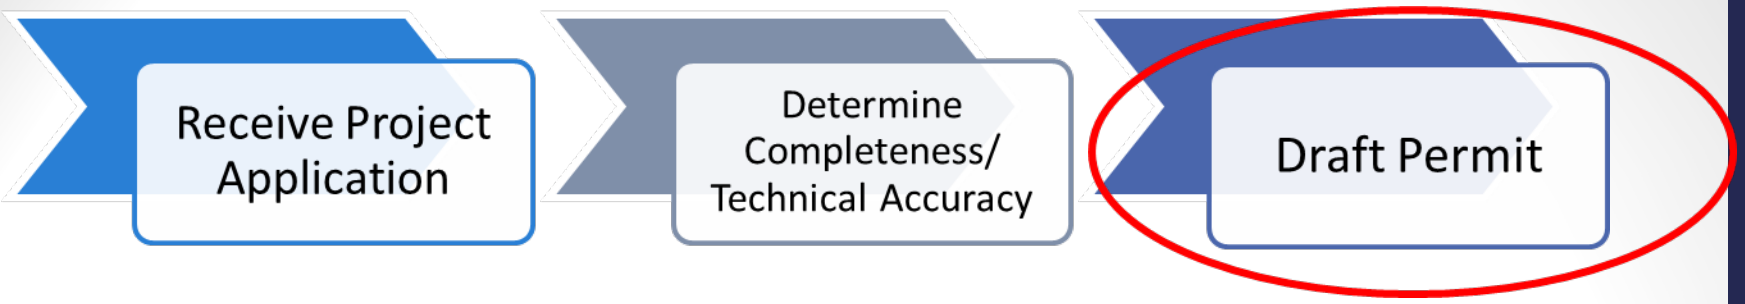


- Project: First Chemical wants to manufacture a new product
- Facts:
  - A reactor, distillation column, and four process tanks will be added
  - Water scrubber installed to control volatile organic carbon emissions
- **Application receipt shown on enSearch online →OPC Environmental Permits Division → EPD Activity Search → Receive Individual Permit Application**

- MDEQ evaluates the following:
  - Emissions changes
    - Volatile organic compounds from new tanks, piping system, and reactor vent
    - Emissions before and after the new scrubber
  - Applicable regulations
    - Larger tanks are subject to EPA storage tank regulations
    - Piping system subject to EPA equipment leak regulations
    - Reactor and distillation column subject to EPA regulations for organic chemicals manufacturing



- MDEQ makes following determination:
  - Construction permit needed because the scrubber is required to keep emissions below major modification thresholds
  - Significant modification to operating permit needed to make scrubber operation federally enforceable and add applicable EPA regulations to the Title V permit



- Instead of issuing both a construction and operating permit, MDEQ modifies only the operating permit.
  - Operating permit must be modified before any construction can begin
- Statement of basis (Information Relative) explains changes

- Significant modification requires 30-day public comment period
  - Notice published in Mississippi Press
  - Notice posted in courthouse, post office and library
  - Copy of draft permit and statement of basis sent to library
- EPA has 45-day review period (electronic process)

Mississippi Department of Environmental Quality

MISSISSIPPI.gov

MDEQ | EPD | ECED | DID

The Mississippi Department of Environmental Quality (MDEQ) is committed to providing public access to environmental information. Our agency believes that keeping citizens informed enhances achievement of our goal of environmental protection.

The Department's continuing investment in information technology facilitates its mission of environmental stewardship. enSearch Online provides a comprehensive view of MDEQ's regulated community (agency interests) and their activities, by allowing the public access to information about permitting and compliance activities within the scope of MDEQ.

The information contained in **enSearch Online** is obtained from MDEQ's enSite (electronic environmental Site Information System) System used by the Office of Pollution Control's Air Division, Environmental Permits Division and Environmental Compliance and Enforcement Division, and the Office of Geology's Mining and Reclamation Division. The purpose of the system is to support permitting and compliance activities of the Department of Environmental Quality. Regulatory programs that are supported by this database are the Surface Water National Pollutant Discharge Elimination System (NPDES) Program; the Air Title V, Construction and Operating Programs; the Solid and Hazardous Waste Programs; Geology Surface Mining and Reclamation Division; and the Waste Tire Program (the UST program is currently not supported). There are other regulatory programs within the Department that do not currently utilize this database including programs managed by the Office of Land and Water, and the Total Maximum Daily Load (TMDL) Program.

Agency Interest Data

- Agency Interest Search
  Search agency interests by name, city, county, SIC, and basin.
- Mississippi Commercial Waste Tire Haulers
  Commercial haulers certified by MDEQ.
- Mississippi Commission on Environmental Quality Orders Issued
  View orders issued on or after January 1, 2011.

OPC Air Division

- Asbestos Project Search
  View the activities of the Air Division Asbestos Branch. Search by project name, city, county, activity, and date.
- Mississippi Asbestos Abatement Certifications
  Find individuals and firms certified by the Air Division Asbestos Branch.
- Mississippi Lead-Based Paint Certifications
  Find individuals and firms certified by the Air Division Lead-Based Paint Branch.

- Information Relative (Statement of Basis)
- Draft Permit
- Public Notice Document

- Comment submitted by public wanting MDEQ to add more monitoring on scrubber
  - MDEQ adds monitoring
  - MDEQ notifies EPA and commenter of change
  - Because more stringent, no additional comment period needed
- EPA notifies MDEQ that they will have no additional comments

- MDEQ issues modified permit
- MDEQ makes changes to Statement of Basis (Information Relative) to address public comment
- MDEQ notifies EPA of final permit issuance via automatic email

Overview of Two General Modifications

Minor Modification

- Facility can make changes when app is submitted
- EPA notified with chance to comment
- No public comment period
- Used when emission changes are relatively small and no custom requirements needed

Significant Modification

- Facility must wait until permit is modified
- EPA gets chance to comment during 30-day notice + 15 days
- Public gets 30-day comment period
- Used to make conditions federally enforceable to reduce potential emissions or make requirements less stringent
