

State of Mississippi

GENERAL POLLUTION CONTROL PERMIT

**TO OPERATE A RECIRCULATION SYSTEM
WITH AN OVERFLOW DISCHARGE AND TO DISCHARGE STORM WATER
IN ACCORDANCE WITH THE
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM**

THIS CERTIFIES

Wet Deck Log Spray with Recirculation
facilities granted a Certificate of Permit Coverage under this permit have permission to:

- discharge overflow from the recirculation pond(s), and
- discharge storm water associated with construction activities

into State waters in accordance with effluent limitations, monitoring requirements, and other conditions set forth herein. This permit is also issued in accordance with the provisions of the Mississippi Air and Water Pollution Control Law (Section 49-17-1 et seq., Mississippi Code of 1972), and the regulations and standards adopted and promulgated thereunder, and under authority granted pursuant to Section 401(b) of the Federal Water Pollution Control Act.

Mississippi Environmental Quality Permit Board

Mississippi Department of Environmental Quality

Issued: **MAY 10 2011**

Expires: **APR 30 2016**

Permit No. **MSG17**

Activity ID No.: PER20100001

ACT0000000002 (WDLSPG) Introduction:

Narrative Requirements:

Condition

No. Condition

T-1 Introduction:

The Wet Deck Log Spray with Recirculation General Permit (WDLSPG) authorizes storm water discharges from construction activities with a land disturbance area of one (1) acre or greater and discharges from Wet Deck Log Spray (WDL) recirculation systems. Discharges from WDL facilities that enter state waters or conveyance systems leading to state waters are subject to regulation and compliance with the conditions set forth in this permit.

This permit also authorizes storm water discharges from other industrial activities, designated by the Executive Director based on the potential for contribution to an excursion of a water quality standard or for significant contribution of pollutants to state waters. This permit replaces the previous Wet Deck Log Spray with Recirculation General Permit that expired on December 31, 2010. [WPC-1]

ACT0000000003 (WDLSPG) Permit Applicability and Coverage:

Narrative Requirements:

Condition No.	Condition
T-1	<p>Permit Area:</p> <p>The Wet Deck Log Spray with Recirculation General Permit covers all areas of the State of Mississippi. [WPC-1]</p>
T-2	<p>Eligibility:</p> <p>(1) Discharges from Wet Deck Log Spray (WDLSPG) Recirculation pond, including water which is sprayed onto the timber, storm water run-off from the timber wet deck storage area, boiler blowdown**, and exterior equipment** and exterior vehicle** washwater where no internal washing or engine washing is occurring and where no detergents or chemicals are being used.</p> <p>** The WDLSPG recirculation system coverage is only for systems that are operated in a no discharge manner and only discharge intermittently as a direct result of rainfall. As a result, facilities which discharge or will discharge boiler blowdown or washwater into the WDLSPG system are only eligible for coverage if these discharges are small in volume and will not interfere with the no discharge operation of the system. Facilities with these operations will be reviewed on a case by case basis to determine if general permit coverage or an individual permit issuance is more appropriate.</p> <p>(2) Discharges composed entirely of storm water and allowable non-storm water discharges identified in ACT3, T-4, and from construction activity, including clearing, grading, excavating and other land disturbing activities of one (1) or more acres.</p> <p>(3) A facility is eligible for coverage under this general permit for discharges of pollutants of concern to water bodies for which there is a Total Maximum Daily Load (TMDL) established or approved by the Environmental Protection Agency if measures and controls are incorporated that are consistent with the assumptions and requirements of such TMDL. To be eligible for coverage under this general permit, the facility must incorporate any conditions applicable to any discharge(s) necessary for consistency with the assumptions and requirements of such TMDL. If, after coverage issuance, a specific wasteload allocation is established that would apply to the facility's discharge, the facility must implement steps necessary to meet that allocation. [WPC-1]</p>

No. Condition

T-3 Eligibility (continued):

(4) A project is eligible for coverage under this general permit for discharges of construction activity related storm water to impaired water bodies on MDEQ's 303(d) list, provided best management practices (BMPs) are employed that prohibit further impairment of the designated and/or existing beneficial uses in the receiving water body. To be eligible for coverage under this general permit, the owner/operator must indicate on the WDLSNOI that the project discharges to a 303(d) listed receiving water and incorporate appropriate BMPs in its SWPPP. MDEQ's 303(d) list of impaired water bodies may be found on MDEQ's website: http://www.deq.state.ms.us/MDEQ.nsf/page/TWB_Total_Maximum_Daily_Load_Section

(5) Discharges must not cause nor contribute to violations of State Water Quality Standards. If a discharge authorized under this permit is later determined to cause or have the reasonable potential to cause or contribute to the violation of an applicable water quality standard, MDEQ will notify the regulated entity of such water quality violation(s) in writing and will provide the information used by MDEQ to make this determination. The regulated entity must take all necessary actions required to ensure future discharges do not cause or contribute to the violation of a water quality standard. If such violations remain or re-occur, then additional measures, such as the addition of Best Management Practices (BMPs) or the requirement to obtain an individual permit, may be required by the Permit Board. Compliance with this requirement does not preclude any enforcement activity as provided by the Clean Water Act for the underlying violation.

(6) Coverage under this permit is available only if the regulated entity's discharges, allowable non-stormwater discharges, and discharge related activities are not likely to jeopardize the continued existence of any species that is listed as endangered or threatened ("listed") under the Endangered Species Act (ESA) or result in the adverse modification or destruction of habitat that is designated as critical under the ESA ("critical habitat"). Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000003 (continued):

Narrative Requirements:

Condition

No. Condition

T-4 Eligibility (continued):

(7) Allowable Non-Storm Water Discharges (listed below) provided they do not cause or contribute to a violation of water quality standards:

- Discharges from actual fire-fighting activities
- Fire hydrant flushings
- Water used to control dust
- Potable water sources including uncontaminated water line flushing
- Routine external building wash down that does not use detergents
- Pavement wash waters where spills or leaks of toxic or hazardous materials have not occurred (unless all spilled material has been removed) and where detergents are not used
- Uncontaminated air conditioning or compressor condensate
- Uncontaminated ground water or spring water
- Foundation or footing drains where flows are not contaminated with process materials such as solvents
- Uncontaminated excavation dewatering
- Landscape irrigation

The above non-stormwater discharges and those identified in ACT3, T-2 should be eliminated or reduced to the extent feasible. The Permit Board staff will review the above discharges on a case by case basis and may require the coverage recipient to apply for and obtain either an individual or an alternate general NPDES Permit.

Coverage under the State of Mississippi Baseline Storm Water General Permit is required for discharges of storm water from industrial activities that do not drain to the WDLS process. [WPC-1]

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000004 (WDLSP) Obtaining Coverage:

Submittal/Action Requirements:

Condition No.	Condition
S-1	<p>How to Obtain Authorization:</p> <p>(1) Owners and/or operators (see Definitions) must submit a Wet Deck Log Spray with Recirculation Notice of Intent (WDLN NOI) and other required submittals in accordance with the requirements of this permit.</p> <p>The owner(s) of the property and the operator(s) associated with the regulated construction activity on the property have joint and severable responsibility for compliance with the permit. Notwithstanding any permit condition to the contrary, the coverage recipient and any person who causes pollution of waters of the state or places waste in a location where they are likely to cause pollution, shall remain responsible under applicable federal and state laws and regulations, and applicable permits.</p> <p>(2) Upon review of the WDLN NOI and other required submittals, the MDEQ staff may require additional information, recommend that coverage not be granted and/or that an alternate permit would be more appropriate. The MDEQ staff recommendations may be brought before the Mississippi Environmental Quality Permit Board (Permit Board) for review and consideration at a regularly scheduled meeting, or at a special meeting at its discretion.</p> <p>(3) Coverage under this permit will not be granted until all other required MDEQ permits, certifications and approvals are satisfactorily addressed.</p> <p>(4) Owners or operators are authorized to discharge under the terms and conditions of this permit only upon receipt of written notification of approval of coverage by the Permit Board staff. Discharge without written notification of coverage or issuance of an individual National Pollutant Discharge Elimination System (NPDES) Storm Water Permit constitutes a violation of the Mississippi Air and Water Pollution Control Law 49-17-29(2)(b). [WPC-1]</p>
S-2	<p>Contiguous Landowner Notification.</p> <p>For a new or expanding facility, the applicant must notify the contiguous landowners to the proposed facility utilizing Certified-Return Receipt Requested mail. Contiguous landowners shall be notified using the form provided in the Forms Package. A copy of the completed form shall be submitted to MDEQ for informational purposes. Copies of the signed receipts and notification forms shall be submitted with the WDLN NOI. Failure to notify the contiguous landowners may be cause for denial or revocation of coverage. If the facility was in existence and operating prior to the issuance date of this permit and no expansion of the facility footprint or operating capacity is proposed, contiguous landowner notification is not required. [WPC-1]</p>

ACT0000000004 (continued):

Submittal/Action Requirements:

Condition No.	Condition
S-3	<p>Additional Public Notice Requirements.</p> <p>For a new or expanding facility, the applicant shall be required to submit proof of publication of a public notice in a daily newspaper of local distribution (an example of the public notice is provided in Appendix F of this permit) as part of the WDLS NOI. The facility shall also send the public notice and a copy of the Wet Deck Log Spray with Recirculation General Permit to the local library and submit the acceptance letter from the librarian as shown in Appendix G of this permit. [WPC-1]</p>
S-4	<p>Requiring an Individual Permit or Alternative General Permit:</p> <p>(1) The Permit Board may require any coverage recipient to apply for and obtain either an individual or an alternative general NPDES permit. Any interested person may petition the Permit Board to take action under this paragraph. The Permit Board may require any coverage recipient to apply for an individual NPDES permit only if the coverage recipient has been notified in writing. Such notice shall include reasons for the Permit Board's decision, an application form and a filing deadline. The Permit Board may grant additional time at its discretion. If a coverage recipient fails to submit a requested application in a timely manner, coverage under this permit is automatically terminated at the end of the day specified for application submittal.</p> <p>(2) Any coverage recipient may request to be excluded from permit coverage by applying for an individual permit or coverage under another general permit. The applicant shall submit the appropriate individual application or Notice of Intent.</p> <p>(3) Coverage under this permit is automatically terminated on the issuance date of the respective alternative individual or general permit. When the request for an alternative individual or general permit is denied, coverage under this permit continues unless terminated by the Permit Board. [WPC-1]</p>
S-5	<p>How to Obtain Recoverage Under the Reissued Permit:</p> <p>If the reissuance of this permit does not occur before it's expiration date, continued coverage under this permit will be allowed until the effective date of the reissued general permit coverage.</p> <p>Once the Wet Deck Log Spray with Recirculation General Permit is reissued, active coverage recipients will receive a recoverage form with a letter of instruction. If a coverage recipient wishes to be covered by the reissued Wet Deck Log Spray with Recirculation General Permit, the recoverage form must be completed and returned to the MDEQ in accordance with the provisions of the letter of instruction. Condition No.	Condition
T-3	<p>Reporting</p> <p>If the results for a given sample analysis are such that any parameter (other than fecal coliform) is not detected at or above the minimum level for the test method used, a value of zero will be used for that sample in calculating an arithmetic mean value for the parameter. If the resulting calculated arithmetic mean value for that reporting period is zero, the permittee shall report "NODI = B" on the DMR. For fecal coliform, a value of 1.0 shall be used in calculating the geometric mean. If the resulting fecal coliform mean value is 1.0, the permittee shall report "NODI = B" on the DMR. For each quantitative sample value that is not detectable, the test method used and the minimum level for that method for that parameter shall be attached to and submitted with the DMR. The permittee shall then be considered in compliance with the appropriate effluent limitation and/or reporting requirement. [WPC-1 Chapter One Section II.G]</p>
T-4	<p>Reporting</p> <p>If the permittee monitors any pollutant as prescribed in the permit more frequently than required by the permit using test procedures approved under 40 CFR Part 136 or, in the case of sludge use or disposal, approved under 40 CFR Part 136 unless otherwise specified in 40 CFR Part 503, or as specified in the permit, the results of this monitoring shall be included in the calculation and reporting of the data submitted in the DMR or sludge reporting form specified by the Permit Board. [WPC-1 Chapter One Section IV.A(15)c(2)]</p>
T-5	<p>Reporting</p> <p>Calculations for all limitations which require averaging of measurements shall utilize an arithmetic mean unless otherwise specified by the Permit Board in the permit. [WPC-1 Chapter One Section IV.A(15)c(3)]</p>
T-6	<p>Test Procedures</p> <p>Test procedures for the analysis of pollutants shall include those set forth in 40 CFR 136 or alternative procedures approved and/or promulgated by EPA. [WPC-1 Chapter One Section IV.A(30)]</p>
T-7	<p>Records Retention</p> <p>All records and results of monitoring activities required by this permit, including calibration and maintenance records, shall be retained by the permittee for a minimum of three (3) years, unless otherwise required or extended by the Permit Board, copies of which shall be furnished to the Department upon request. [WPC-1 Chapter One Section IV.A(29)a]</p>

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000006 (continued):

Narrative Requirements:

Condition No.	Condition
T-8	<p>Falsifying Reports</p> <p>Any permittee who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required by the Permit Board to be maintained as a condition in a permit, or who alters or falsifies the results obtained by such devices or methods and/or any written report required by or in response to a permit condition, shall be deemed to have violated a permit condition and shall be subject to the penalties provided for a violation of a permit condition pursuant to Section 49-17-43 of the Code. [WPC-1 Chapter One Section IV.A(29)d]</p>
T-9	<p>Facility Expansion and/or Modification</p> <p>Any facility expansion, production increases, process modifications, changes in discharge volume or location or other changes in operations or conditions of the permittee which may result in a new or increased discharge of waste, shall be reported to the Permit Board by submission of a new application for a permit pursuant to Section II.A. of the Mississippi Wastewater Regulations, or if the discharge does not violate effluent limitations specified in the permit, by submitting to the Permit Board a notice of a new or increased discharge. [WPC-1 Chapter One Section IV.A(14)]</p>
T-10	<p>Duty to Comply</p> <p>The permittee must comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the Clean Water Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or denial of a permit renewal application. [WPC-1 Chapter One Section IV.A(2)]</p>
T-11	<p>Duty To Reapply</p> <p>If the coverage recipient wishes to continue an activity regulated by this permit after the expiration date of this permit, coverage recipient must apply for and obtain authorization as required by the new permit. [WPC-1 Chapter One]</p>

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

Page 16 of 44

ACT0000000006 (continued):

Narrative Requirements:

Condition No.	Condition
T-12	<p>Proper Operation, Maintenance and Replacement</p> <p>The permittee shall at all times properly operate, maintain, and when necessary, promptly replace all facilities and systems of collection, treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance includes adequate laboratory controls and appropriate quality assurance procedures. Proper replacement includes maintaining an adequate inventory of replacement equipment and parts for prompt replacement when necessary to maintain continuous collection and treatment of wastewater. This provision requires the operation of back-up or auxiliary facilities or similar systems that are installed by a permittee only when the operation is necessary to achieve compliance with the conditions of the permit. [WPC-1 Chapter One Section IV.A(18)]</p>
T-13	<p>Duty to Mitigate</p> <p>The permittee shall take all reasonable steps to minimize or prevent any discharge or sludge use or disposal in violation of the permit that has a reasonable likelihood of adversely affecting human health or the environment. [WPC-1 Chapter One Section IV.A(19)]</p>
T-14	<p>Duty to Provide Information</p> <p>The owner or operator shall furnish to the Permit Board, within a reasonable time, any information that the Permit Board may request to determine compliance with this permit. [WPC-1 Chapter One]</p>
T-15	<p>Bypassing</p> <p>The permittee shall comply with the terms and conditions regarding bypass found in 40 CFR 122.41(m). [40 CFR 122.41(m)]</p>
T-16	<p>Bypassing - Definitions</p> <p>"Bypass" means the intentional diversion of waste streams from any portion of a treatment facility.</p> <p>"Severe property damage" means substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production. [40 CFR 122.41(m)]</p>

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000006 (continued):

Narrative Requirements:

Condition No.	Condition
T-17	<p>Bypassing - Bypass not exceeding limitations</p> <p>The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the notice and prohibition provisions of the bypass requirements in this permit. [40 CFR 122.41(m)]</p>
T-18	<p>Bypassing -Notice</p> <p>Anticipated bypass- If the permittee knows in advance of the need for a bypass, it shall submit prior notice, if possible at least ten days before the date of the bypass.</p> <p>Unanticipated bypass- The permittee shall submit notice of an unanticipated bypass as required by the twenty-four hour reporting requirements set forth in this permit. [40 CFR 122.41(m)]</p>
T-19	<p>Bypassing- Prohibition of Bypass</p> <p>(1) Bypass is prohibited, and the Commission may take enforcement action against a permittee unless: (i) Bypass was unavoidable to prevent loss of life, personal injury, or sever property damage. (ii) There was no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventative maintenance; and (iii) The permittee submitted notices as required under the Twenty-Four Hour reporting requirements set forth in this permit.</p> <p>(2) The Commission may approve an anticipated bypass, after considering its adverse affects, if the Commission determines that it will meet the three conditions listed above in paragraph (1) of this permit condition. [40 CFR 122.41(m)]</p>
T-20	<p>Upsets</p> <p>The permittee shall meet the conditions of 40 CFR 122.41(n) regarding "Upsets" and as in the upset requirements of this permit. [WPC-1 Chapter One Section IV.A(27)]</p>

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000006 (continued):

Narrative Requirements:

Condition No.	Condition
T-21	<p>Upsets- Definition</p> <p>"Upset" means an exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation. [WPC-1 Chapter One Section IV.A(27)]</p>
T-22	<p>Upsets - Effect of an Upset</p> <p>An upset constitutes an affirmative defense to an action brought for noncompliance with such technology based permit effluent limitations if the "conditions necessary for demonstration of upset" requirements of this permit are met. Any determination made during administrative review of claims that noncompliance was caused by upset, and before an action for noncompliance, shall not constitute final administrative action subject to judicial review. [WPC-1 Chapter One Section IV.A(27)]</p>
T-23	<p>Upsets - Conditions necessary for demonstration of upset</p> <p>A permittee who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed contemporaneous operating logs, or other relevant evidence that:</p> <ol style="list-style-type: none">(1) An upset occurred and that the permittee can identify the cause(s) of the upset;(2) The permitted facility was at the time being properly operated;(3) The permittee submitted notice of the upset as required in 40 CFR 122.41(L)(6)(ii)(B)(24-hour notice of noncompliance); and(4) The permittee complied with any remedial measures required under 40 CFR 122.41(d) (Duty to Mitigate). [WPC-1 Chapter One Section IV.A(27)]
T-24	<p>Upsets - Burden of proof</p> <p>In any enforcement proceeding the permittee seeking to establish the occurrence of an upset has the burden of proof. [WPC-1 Chapter One Section IV.A(27)]</p>
T-25	<p>Removed Substances</p> <p>Solids, sludges, filter backwash, or other residuals removed in the course of treatment or control of wastewater shall be disposed of in a manner such as to prevent such materials from entering State waters and in a manner consistent with the Mississippi Solid Waste Disposal Act, the Federal Resource Conservation and Recovery Act, and the Mississippi Water Pollution Control Act. [WPC-1 Chapter One Section IV.A(21)]</p>

No. Condition

T-30 Signatory Requirements - Application Signatures

All permit applications shall be signed as follows:

(1) For a corporation: by a responsible corporate officer. For the purpose of this section, a responsible corporate officer means: (i) A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy - or decision - making functions for the corporation, or (ii) the manager of one or more manufacturing, production, or operating facilities, provided, the manager is authorized to make management decisions which govern the operation of the regulated facility including having the explicit or implicit duty of making major capital investment recommendations, and initiating and directing other comprehensive measures to assure long term environmental compliance with environmental laws and regulations; the manager can ensure that the necessary systems are established or actions taken to gather complete and accurate information for permit application requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.

(2) For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or

(3) For a municipality, State, Federal, or other public agency: by either a principal executive officer or ranking elected official. [WPC-1 Chapter One Section II.C]

T-31 Signatory Requirements -Reports and Other Information

All reports required by the permit and other information requested by the Permit Board shall be signed by a person described by the application signature requirements in this permit or by a duly authorized representative of that person. A person is a duly authorized representative only if:

(1) The authorization is made in writing by a person described by the application signature requirements;

(2) The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of plant manager, operator of a well or a well field, superintendent, position having overall responsibility for environmental matters for the company. (A duly authorized representative may thus be either a named individual or any individual occupying a named position.); and

(3) The written authorization is submitted to the Permit Board. [WPC-1 Chapter One Section II.C]

No. Condition

S-1 IMPLEMENTATION REQUIREMENTS:

The coverage recipient shall:

(1) Implement the site-specific SWPPP and retain a copy of the SWPPP at the permitted site. In cases where there is no office or shelter to maintain documents onsite, the SWPPP can be kept locally available (i.e., able to be produced within an hour of being requested by an MDEQ inspector). Failure to implement the SWPPP is a violation of permit requirements. A copy of the SWPPP must be made available to MDEQ inspectors for review at the time of an on-site inspection.

(2) Implement the following pre-construction activities:

(A) Mark off areas of "disturbance", "no disturbance" and "sensitive areas" (i.e., delineate and clearly flag or mark off areas such as steep slopes, highly erodible soils or other sensitive areas),

(B) Preserve native topsoil on the site to the extent feasible, and

(C) Limit construction stream crossings to the minimum necessary to provide access for the construction project.

(3) Ensure that appropriate Best Management Practices (BMPs) are in place upon commencement of construction.

(4) Amend the SWPPP if notified at any time by the Executive Director of the MDEQ that the SWPPP does not meet the minimum requirements. Coverage recipient shall certify in writing to the Executive Director that the requested changes have been made. Unless otherwise provided, the requested changes shall be made within fifteen (15) days.

(5) Amend the SWPPP whenever there is a change in design, construction, operation, or maintenance which may potentially affect the discharge of pollutants to waters of the State; or the SWPPP proves to be ineffective in controlling storm water pollutants. Unless otherwise provided, the requested change shall be made within thirty (30) days. [WPC-1]

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Submittal/Action Requirements:

Condition No.	Condition
S-2	<p>IMPLEMENTATION REQUIREMENTS (continued):</p> <p>(6) Install needed erosion controls even if they may be located in the way of subsequent activities, such as utility installation, grading or construction. It shall not be an acceptable defense that controls were not installed because subsequent activities would require their replacement or cause their destruction.</p> <p>(7) Install additional and/or alternative erosion and sediment controls when existing controls prove to be ineffective in preventing sediment from leaving the site.</p> <p>(8) Comply with applicable State or local waste disposal, sanitary sewer or septic system regulations</p> <p>(9) Erosion and sediment controls shall be maintained at all times. Except for sediment basins, all accumulated sediment shall be removed from structural controls when sediment deposits reach one-third to one-half the height of the control. For sediment basins, accumulated sediment shall be removed when the capacity has been reduced by 50%. All removed sediment deposits shall be properly disposed. Non-functioning controls shall be repaired, replaced or supplemented with functional controls within twenty-four (24) hours of discovery or as soon as field conditions allow.</p> <p>(10) If, after coverage issuance, a specific wasteload allocation is established that would apply to the facility's discharge, the facility must implement steps necessary to meet that allocation. [WPC-1]</p>
S-3	<p>COMPLIANCE WITH LOCAL STORM WATER ORDINANCES:</p> <p>(1) The SWPPP shall be in compliance with all local storm water ordinances.</p> <p>(2) When storm water discharges into an MS4 (municipal separate storm sewer system), the owner or operator shall make the SWPPP available to the local authority and/or allow site access, upon request. [WPC-1]</p>

------------------	-----------

S-4	INSPECTION REQUIREMENTS:
-----	--------------------------

Inspection of all erosion and sediment controls, outfalls, receiving streams (if feasible) and other SWPPP requirements shall be performed during permit coverage using a copy of the form provided in the appendix of this permit, and inspections shall be performed by qualified personnel (see Definitions):

(1) At least weekly for a minimum of four inspections per month; and

(2) As often as is necessary to ensure that appropriate erosion and sediment controls have been properly constructed and maintained and to determine if additional or alternative control measures are required.

Before conducting the site inspection, the inspector should review Chapter 4, Inspector's Checklist and Troubleshooting Chart found in MDEQ's Field Manual for Erosion and Sediment Control on Construction Sites in Mississippi.

The MDEQ strongly recommends that coverage recipients perform a "walk through" inspection of the construction site before anticipated storm events to ensure controls are in place and will function properly. [WPC-1]

S-5	<p>SUSPENSION OF WEEKLY INSPECTIONS AND MONTHLY RECORD KEEPING:</p> <p>Coverage recipients under this general permit may suspend weekly inspection and monthly record keeping requirements, if the coverage recipient certifies that:</p> <ul style="list-style-type: none">(1) Land disturbing activities have temporarily ceased,(2) No further land disturbing activities are planned for a period of at least six (6) months,(3) Areas that have been disturbed meet the definition of "final stabilization" (see Definitions), with no active erosion, and(4) Vegetative cover has been established. <p>Color photographs representative of the site must be submitted with the Inspection Suspension Form provided in the Appendix of this permit. The coverage recipient shall notify the MDEQ once construction activities are resumed and the weekly inspections shall commence immediately and as required in ACT7, S-4. The coverage recipient is still responsible for all permit conditions during the suspension period and nothing in this condition shall limit the rights of the MDEQ to take enforcement or other actions against the coverage recipient. [WPC-1]</p>
S-6	<p>The inspections described in ACT7, S-4 must be documented on copies of the Monthly Inspection Report and Certification Form provided in the Appendix of this permit and be kept with the SWPPPP. [WPC-1]</p>
S-7	<p>REQUEST FOR TERMINATION OF THE WEEKLY CONSTRUCTION EROSION AND SEDIMENT CONTROL INSPECTIONS AND MONTHLY RECORDKEEPING:</p> <p>Upon successful completion of all permanent erosion and sediment controls for a covered project, a completed Request for Termination of the Weekly Construction Erosion and Sediment Control Inspections Form (provided in the Forms Package) shall be submitted to MDEQ. Upon receiving the completed form, MDEQ staff will inspect the site. If no sediment and erosion control problems are identified and adequate permanent controls are established, the coverage recipient will receive a letter from MDEQ verifying termination of inspection requirements. The obligation to conduct weekly inspections is not terminated until written confirmation is received from MDEQ. [WPC-1]</p>

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000007 (continued):

Narrative Requirements:

Condition	Condition
T-1	<p>SWPPP DEVELOPMENT:</p> <p>A site-specific SWPPP shall be developed requiring the design, installation, implementation and maintenance of effective pollution prevention measures by each owner or operator subject to this permit. A SWPPP shall be prepared in accordance with sound engineering practices and shall identify potential sources of pollution, which may reasonably be expected to affect the quality of storm water discharges associated with construction activity. The SWPPP shall describe and ensure the implementation of specific best management practices for the project site, which will reduce pollutants in storm water discharges and assure compliance with the terms and conditions of this permit. [WPC-1]</p>
T-2	<p>SWPPP CONTENT:</p> <p>Erosion and Sediment Controls and Soil Stabilization Requirements:</p> <p>The SWPPP shall list and describe site-specific controls appropriate for the construction activities as well as the procedures for implementing such controls. Controls shall be designed to retain sediment on-site and to minimize the discharge of pollutants. If any of the below controls cannot be implemented on the project site, the SWPPP must include written justification as to why site-specific constraints and/or costs make the control(s) infeasible. At a minimum, such controls must be designed, installed and maintained to:</p> <ol style="list-style-type: none">(1) Control storm water volume and velocity within the site to minimize soil erosion;(2) Control storm water discharges, including both peak flow rates and total storm water volume, to minimize erosion at outlets and to minimize downstream channel and stream bank erosion;(3) Minimize the amount of soil exposed during construction activity;(4) Minimize the disturbance of steep slopes. [WPC-1]

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000007 (continued):

Narrative Requirements:

Condition	Condition
T-4	<p>The number and type of BMPs included in the SWPPP must reflect the specific conditions of the construction site. An effective SWPPP includes a combination of BMPs that are designed to work together. A combination of BMPs is listed below and must be included as minimum components of a SWPPP. These controls must be in accordance with the design standards set forth in the most current edition of the "Planning and Design Manual for the Control of Erosion, Sediment & Storm Water" or other recognized manual of design.</p> <p>(1) Vegetative Practices shall be designed to preserve existing vegetation where feasible and initiate vegetative stabilization measures after land disturbing activities. Such practices may include, but not limited to, temporary seeding, permanent seeding, mulching, sod stabilization, vegetative buffer strips, tree protection and topsoil preservation.</p> <p>Soil stabilization-vegetative stabilization measures must be initiated whenever any clearing, grading, excavating or other land disturbing activities have temporarily or permanently ceased on any portion of the site and will not resume for a period of fourteen (14) days or more. The appropriate temporary or permanent vegetative practices shall be implemented within seven (7) calendar days.</p> <p>Specific BMPs that must be included, unless infeasible (see Definitions) are:</p> <p>(A) Buffer zones (see Definition) shall be maintained between land disturbing activities and perennial water bodies. A minimum 150-foot buffer zone is recommended.</p> <p>(B) Topsoil should be stockpiled and used in areas that will be re-vegetated. When final grade is reached it should be distributed to a minimum depth of 2 inches on 3:1 slopes and 4 inches on flatter slopes.</p> <p>(C) Heavy equipment use in areas to be re-vegetated should be avoided. If compaction cannot be avoided, the top 4 inches of the soil bed should be tilled before re-vegetation. Any necessary fertilizer or other soil amendments should be added during the tilling process.</p> <p>The SWPPP must contain written justification as to why any of these specific controls were not deemed feasible. [WPC-1]</p>

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000007 (continued):

Narrative Requirements:

Condition No.	Condition
T-5	<p>(2) Structural practices shall divert flows from exposed soils, store flows or otherwise limit runoff from exposed areas. Such practices may include, but are not limited to, construction entrance/exit, silt fences, earth dikes, brush barriers, drainage swales, check dams, subsurface drains, pipe slope drains, level spreaders, drain inlet protection, outlet protection, detention/retention basins, sediment traps, temporary sediment basins or equivalent sediment controls.</p> <p>Specific practices that must be included, unless infeasible, are:</p> <p>(A) for drainage locations (a drainage point at boundary of land disturbing activity) that serve an area with ten (10) or more disturbed acres at one time, a temporary (or permanent) sediment basin providing at least 3600 cubic feet (133 cubic yards) of storage per acre drained shall be provided until final stabilization of the site. Sediment basins must be installed before major site grading and utilize outlet structures that withdraw water from the surface and that are designed for a minimum 2-year, 24-hour storm event. [WPC-1]</p>
T-6	<p>(B) Steep Slopes (see Definition) that cannot be avoided must have, at a minimum, silt fences or equivalent sediment controls for all down slope boundaries (and for those side slope boundaries deemed appropriate by individual site conditions), unless a sediment basin providing storage for a calculated volume of runoff from a 2-year, 24-hour storm or 3,600 cubic feet of storage per acre drained is provided.</p> <p>(C) Construction entrances/exits shall be installed wherever traffic will be leaving a construction site and moving directly onto a paved public road.</p> <p>(D) Storm Drain Inlets-Inlets that could receive storm water from construction activities shall be protected by surrounding or covering with a filter material until final stabilization has been achieved. [WPC-1]</p>
T-7	<p>(E) Perimeter Controls - Natural areas shall be maintained and supplemented with silt fence and fiber rolls around project perimeter. If not feasible to maintain natural areas, a silt fence or similar controls, such as fiber rolls, are sufficient.</p> <p>(F) Phasing - Schedule or sequence construction activities so as to concentrate work in certain areas so as to minimize the amount of soil that is exposed at one time</p> <p>The SWPPP must contain written justification as to why any of these specific controls were not deemed feasible. [WPC-1]</p>

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000007 (continued):

Narrative Requirements:

Condition	Condition
T-8	<p>(3) Facilities discharging into impaired receiving waters (i.e., receiving stream segments which are listed on MDEQ's 303(d) List of Impaired Waters or segments for which a Total Daily Maximum Load (TMDL) has been approved) must identify the pollutant of concern(s) for the receiving stream in the SWPPP. If applicable, the SWPPP shall describe how the selected BMPs will ensure that discharges from the site will not cause or contribute to excursions of the water quality standards in the receiving stream.</p> <p>(4) A description of any post-construction control measures. Post-construction control measures should be installed, as necessary, to control pollutants in storm water after construction is complete. These controls include, but are not limited to, one or more of the following: on-site infiltration of runoff, flow attenuation using open vegetated swales, exfiltration trenches and natural depressions, constructed wetlands and retention/detention structures. Where needed, velocity dissipation devices shall be placed at detention or retention pond outfalls and along the outfall channel to provide for a non-erosive flow. [WPC-1]</p>
T-9	<p>Housekeeping Practices:</p> <p>The owner or operator shall design, install, implement and maintain practices appropriate to prevent pollutants from entering storm water from construction sites because of poor housekeeping. These practices must be listed in the SWPPP and located on the site map.</p> <p>The owner or operator shall designate and report in the SWPPP areas for equipment maintenance and repair and concrete chute wash off; provide waste receptacles and regular collection of waste; provide adequately maintained sanitary facilities; provide protected storage areas for chemicals, paints, solvents, fertilizers, pesticides, herbicides, detergents, and other potentially toxic materials; and implement spill and leak prevention practices and response procedures if spills and leaks do occur; minimize the exposure of building materials, building products, construction wastes, trash and landscape materials. These areas and specific potential pollutants shall be addressed in the SWPPP and located on the scaled site map. [WPC-1]</p>

Page 38 of 44

ACT0000000008 (WDLSP) Definitions:

Narrative Requirements:

Condition No.	Condition
T-1	Definitions: General The permittee shall refer to WPC-1, Chapter 1, Section I.A for definitions of any permit term not specified in this permit. [WPC-1 Chapter One Section I.A]
T-2	ANNUAL AVERAGE OR YEARLY AVERAGE means the average of "daily discharges" over a calendar year, calculated as the sum of all "daily discharges" measured during the calendar year divided by the number of "daily discharges" measured during the calendar year. The yearly average for fecal coliform bacteria is the geometric mean of "daily discharges" during the calendar year. In computing the geometric mean for fecal coliform bacteria, the value one (1) shall be substituted for sample results of zero. [WPC-1 Chapter One Section I.A]
T-3	ANNUAL MAXIMUM OR YEARLY MAXIMUM means the highest "daily discharge" measured over a calendar year. [WPC-1 Chapter One Section I.A]
T-4	BEST MANAGEMENT PRACTICES (BMPs) means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the discharge of pollutants to waters of the United States. BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage. [WPC-1 Chapter One Section I.A]
T-5	BUFFER ZONE, as used in this permit, means a strip of dense undisturbed perennial vegetation, either original or reestablished, that borders perennial streams and rivers, ponds and lakes and wetlands. Buffer zones are established for the purposes of slowing water runoff, enhancing water infiltration, and minimizing the risk of any potential nutrients or pollutants from leaving the upland area and reaching surface waters. Buffer zones are most effective when storm water runoff is flowing into and through the buffer zone as shallow sheet flow, rather than in concentrated form such as in channels, gullies, or wet weather conveyances. Therefore, it is critical that the design of any development include management practices, to the maximum extent practical, that will result in storm water runoff flowing into and through the buffer zone as shallow sheet flow. [WPC-1]
T-6	CFR means the Code of Federal Regulations. [WPC-1]
T-7	CLEAN WATER ACT (CWA) refers to the Federal Water Pollution Control Act, 33 U.S.C. section 1251 et seq. [WPC-1]
T-8	COMMENCEMENT OF CONSTRUCTION ACTIVITIES means the initial disturbance of soils associated with clearing, grading, or excavating activities or other construction-related activities. [WPC-1]
T-9	COMMISSION means the Mississippi Commission on Environmental Quality. [WPC-1]

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000008 (continued):

Narrative Requirements:

Condition No.	Condition
T-10	COMPACTION means the process by which the soil grains are rearranged to decrease void space and bring the grains into closer contact with one another and thereby increase the weight of solid material per cubic foot. [WPC-1]
T-11	CONSTRUCTION ACTIVITY as used in this permit, includes construction activity as defined in 40 CFR part 122.26(b)(14)(x). This includes a disturbance to the land that results in the change in topography, existing soil cover (both vegetative and non-vegetative), or the existing topography that may result in accelerated storm water runoff, leading to soil erosion and movement of sediment into surface waters or drainage systems. Examples of construction activity may include clearing, grading, filling and excavating. Construction activity does not include routine maintenance that is performed to maintain the original line and grade, hydraulic capacity, or original purpose of the site. [WPC-1]
T-12	CONTROL MEASURE as used in this permit, refers to any Best Management Practice or other method used to prevent or reduce the discharge of pollutants to waters of the United States. [WPC-1]
T-13	DAILY DISCHARGE means the "discharge of a pollutant" measured during a calendar day or any 24-hour period that reasonably represents the calendar day for purposes of sampling. For pollutants with limitations expressed in units of mass, the "daily discharge" is calculated as the total mass of the pollutant discharged over the day. For pollutants with limitations expressed in other units of measurements, the "daily average" is calculated as the average measurement of the discharge of the pollutant over the day. [WPC-1]
T-14	EXECUTIVE DIRECTOR means the Executive Director of the Department of Environmental Quality. [WPC-1]
T-15	FACILITY or ACTIVITY means any NPDES "point source" or any other facility or activity (including land or appurtenances thereto) that is subject to regulation under the NPDES program. [WPC-1]

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000008 (continued):

Narrative Requirements:

Condition No.	Condition
T-16	<p>FINAL STABILIZATION means that either:</p> <p>(1) All soil disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of at least 70% for the area has been established or equivalent measures (i.e., concrete or asphalt paving, rip rap, etc.) have been employed; or</p> <p>(2) For individual lots part of a larger common plan of development or sale in residential or commercial developments, that either:</p> <p>(A) The coverage recipient has completed final stabilization as specified in (1) above, or</p> <p>(B) The coverage recipient has established temporary stabilization before another property owner assumes operational control for the property AND the coverage recipient for the larger common plan of development has provided the appropriate Notice of Intent or Registration form, the appropriate Construction General Permit, and guidance documents to the new property owner and the new owner assumes control by completing the appropriate NOI or Registration Form. [WPC-1]</p>
T-17	<p>GRAB SAMPLE is a sample that is taken from a wastestream on a one-time basis without consideration of the flow rate of the wastestream and without consideration of time. Samples should be collected from the center of the flow channel, where turbulence is at a maximum. [WPC-1]</p>
T-18	<p>INFEASIBLE means there is a site-specific constraint that makes a control technology impossible and/or not reasonable to implement, or that implementing the control would be cost-prohibitive. [WPC-1]</p>
T-19	<p>MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) means a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains): (i) Owned or operated by a State, city, town, borough, county, parish, district, association, or other public body (created by or pursuant to State law) having jurisdiction over disposal of sewage, industrial wastes, storm water, or other wastes, including special districts under State law such as a sewer district, flood control district or drainage district, or similar entity, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under section 208 of the CWA that discharges to waters of the United States, (ii) Designed or used for collecting or conveying storm water, (iii) Which is not a combined sewer, and (iv) Which is not part of a Publicly Owned Treatment Works (POTW). [WPC-1]</p>
T-20	<p>NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) means the regulations under the Clean Water Act which prohibits discharge of pollutants into waters of the United States unless a special permit is issued. [WPC-1]</p>
T-21	<p>NOI is an acronym for "Notice of Intent" to be covered by this permit and is the mechanism used to apply for coverage under a general permit. [WPC-1]</p>

ACT0000000008 (continued):

Narrative Requirements:

Condition No.	Condition
T-22	NORMAL WORKING HOURS, for the purpose of this permit, means the hours that personnel are typically working at the project site (e.g., daylight hours, Monday through Friday, except recognized holidays). [WPC-1]
T-23	OWNER or OPERATOR for the purpose of this permit and in the context of storm water associated with construction activity, means any party associated with a construction project that meets either of the following two criteria: (1) The party has operational control over construction plans and specifications, including the ability to make modifications to those plans and specifications; or (2) The party has day to day operational control of those activities at a project which are necessary to ensure compliance with a storm water pollution prevention plan for the site or other permit conditions (e.g., they are authorized to direct workers at a site to carry out activities required by the SWPPP or comply with other permit conditions). This definition is provided to inform coverage recipients of MDEQ's interpretation of how the regulatory definitions of "owner or operator" and "facility or activity" are applied to discharges of storm water associated with construction activity. [WPC-1]
T-24	PERMIT BOARD means the Mississippi Environmental Quality Permit Board established pursuant to Miss. Code Ann. 49-17-28. [WPC-1]
T-25	POLLUTANT is defined at 40 CFR 122.2. A partial listing from this definition includes: dredged spoil, solid waste, sewage, garbage, sewage sludge, chemical wastes, biological materials, heat, wrecked or discarded equipment, rock, sand, sediment, silt, cellar dirt, and industrial or municipal waste. [WPC-1]
T-26	QUALIFIED PERSONNEL means a person knowledgeable in the principles and practice of erosion and sediment controls who possesses the skills to assess conditions at the construction site that could impact storm water quality and to assess the effectiveness of any sediment and erosion control measures selected to control the quality of storm water discharges from the construction activity. [WPC-1]
T-27	STATE LAW means The Mississippi Air and Water Pollution Control Law, specifically, Miss. Code Ann 49-17-1 through 49-17-43, and any subsequent amendments. [WPC-1]
T-28	STEEP SLOPES, as used in this permit, means slopes or grades steeper than (3:1). [WPC-1]
T-29	STORM WATER means rainfall runoff, snowmelt runoff, and surface runoff. [WPC-1]
T-30	STORM WATER ASSOCIATED WITH CONSTRUCTION ACTIVITY as used in this permit, refers to a discharge of pollutants in storm water from areas where soil disturbing activities (e.g., clearing, grading, or excavation), construction materials or equipment storage or maintenance (e.g., stock piles, borrow area, concrete truck chute wash down, fueling) are located. [WPC-1]

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

ACT0000000008 (continued):

Narrative Requirements:

Condition No.	Condition
T-31	STORM WATER POLLUTION PREVENTION PLAN (SWPPP) means a plan that includes site map(s), an identification of construction/contractor activities that could cause pollutants in the storm water, and a description of measures or practices to control these pollutants. [WPC-1]
T-32	SUBMITTED means the document is postmarked on or before the applicable deadline, except as otherwise specified. [WPC-1]
T-33	SUCCESSFUL COMPLETION OF ALL PERMANENT EROSION AND SEDIMENT CONTROLS means when land disturbing construction activities have been completed and disturbed areas have been stabilized with no significant erosion occurring. [WPC-1]
T-34	TEMPORARY STABILIZATION means practices such as seeding, mulching and erosion control blankets or mats that are used to stabilize exposed areas in which construction activity has been temporarily suspended. [WPC-1]
T-35	TOPSOIL means the top layer of undisturbed soil, consisting of a high percentage of organic matter, which is conducive to plant growth. [WPC-1]
T-36	TOTAL MAXIMUM DAILY LOAD (TMDL) means the maximum daily amount of a pollutant that can enter a water body so that the water body will meet and continue to meet state water quality standards. [WPC-1]
T-37	TURBIDITY is an expression of the optical property that causes light to be scattered and absorbed rather than transmitted with no change in direction of flux level through the sample caused by suspended and colloidal matter such as clay, silt, finely divided organic and inorganic matter and plankton and other microscopic organisms. [WPC-1]
T-38	TURBIDITY METERS as used in this permit, are hand held or in-line devices used to measure the turbidity level of storm water discharges. [WPC-1]
T-39	UPSET means an exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the reasonable control of the coverage recipient. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventative maintenance, or careless or improper operation. [WPC-1]
T-40	WATERS OF THE STATE means all waters within the jurisdiction of this State, including all streams, lakes, ponds, wetlands, impounding reservoirs, marshes, watercourses, waterways, wells, springs, irrigation systems, drainage systems, and all other bodies or accumulations of water, surface and underground, natural or artificial, situated wholly or partly within or bordering upon the State, and such coastal waters as are within the jurisdiction of the State, except lakes, ponds, or other surface waters which are wholly landlocked and privately owned, and which are not regulated under the Federal Clean Water Act (33 U.S.C. 1251 et seq.). [WPC-1]

Narrative Requirements:

Condition No.	Condition
T-41	WPC-1 means the State of Mississippi's Wastewater Regulations for National Pollutant Discharge Elimination System (NPDES) Permits, Underground Injection Control (UIC) Permits, State Permits, Water Quality Based Effluent Limitations and Water Quality Certifications. [WPC-1]

Permit to Discharge Wastewater in Accordance with National Pollutant Discharge Elimination System

Wet Deck Log Spray General Permit

Facility Requirements

Permit Number:MSG17

Activity ID No.: PER20100001

RPNT0000000001 (MSG17-Regulated Outfalls) Regulated Outfall(s) - Overflow(s) from Wet Deck Recirculation System(s):

Limitation Requirements:

Condition No.	Parameter	Condition
L-1		The wet deck log spray recirculation system should be operated in a manner which maximizes freeboard and maintains a minimum of two feet of freeboard in the wet deck log spray recirculation pond. [WPC-1 Chapter One]
L-2		There shall be no discharge of process wastewater from the wet deck log spray recirculation pond other than water which is sprayed onto the timber and storm water run-off from the timber wet deck storage area. The term "process wastewater" means any water, which during manufacturing or processing, comes into direct contact with or results from the production or use of any raw material, intermediate product, finished product, by-product, or waste product. (40 CFR 122.2). The terms specifically excludes non-contact cooling water, material storage yard runoff, boiler blowdown, and fire control water (40 CFR 429.11). [WPC-1 Chapter One]
L-3		There shall be no discharge of debris from this facility into waters of the State. Debris is defined as woody material such as bark, twigs, branches, heartwood, or sapwood that will not pass through a 1-inch (2.54 cm) diameter round opening. [WPC-1 Chapter One]

Submittal/Action Requirements:

Condition No.	Condition
S-1	The Permittee shall submit analytical results on an annual Discharge Monitoring Report (DMR): Due annually by the 28th of January. [WPC-1 Chapter One Section IV.A(15)c]

Request for Termination (RFT) of Coverage

Use this form to request coverage termination 90 days prior to closing and abandoning the premises as defined in the "State of Mississippi Wastewater Regulations".

General NPDES Permit No. MSG17 ____ County _____

(Fill in your Certificate of Coverage Number and County)

(Please Print or Type)

Facilities planning to cease its regulated industrial activity and/or abandon the premises upon which it operates shall request termination of its Wet Deck Log Spray with Recirculation NPDES General Permit Coverage by completing this form and attaching a closure plan which addresses how and when all industrial machinery, material handling equipment, manufactured products, by-products, raw materials, stored chemicals, and solid and liquid waste and residues will be removed from the premises so that no potential environmental hazard to the waters of the State will be presented.

Contiguous Landowner Notification of a Wet Deck Log Spray with Recirculation Facility

(See page 5, Condition S-2)

I, _____, (Please Print Authorized Name of Company) am proposing to construct and operate a Wet Deck Log Spray with Recirculation system at _____ (Complete Address with County, not a P.O. Box). The construction and subsequent operation will involve the periodic discharge of wet deck recirculation water, other de minimus wastewaters and storm water. The construction of the facility may involve the clearing, grading, and excavation of land. This notification is to provide you with an opportunity to comment to the Mississippi Department of Environmental Quality Permit Board regarding the requested granting of coverage under the General Permit MSG17_____ for Wet Deck Log Spray with Recirculation. This notice has been sent to you by Certified Mail - Return Receipt Requested. If you have no comments regarding this proposed facility, no response is necessary and the permitting process will continue toward making a decision on granting coverage. If you have any comments, they must be received by the Mississippi Department of Environmental Quality within 14 days of receipt of this correspondence. **The Department of Environmental Quality is limited in its review of this project to those environmental issues in which statutory authority has been given.** Comments are to be mailed to the following address:

**Chief, Environmental Permits Division
Mississippi Department of Environmental Quality
P. O. Box 2261
Jackson, Mississippi 39225-2261**

Public Notice
Mississippi Environmental Quality Permit Board
P. O. Box 10385
Jackson, MS 39289-0385
Telephone No. (601) 961-5171

(Date Notice Begins in Area Paper)

(Name): _____ at (Facility Address: Street, City, Zip) _____ has applied to the Mississippi Department of Environmental Quality for coverage and/or modification under General Permit MSG17____ to construct and operate a Wet Deck Log Spray with Recirculation facility. Such construction and operation will involve the discharge of storm water and process wastewater. Such construction and operation may involve the clearing, grading, and excavation of land.

Provided the above referenced facility meets the eligibility requirements of General Permit MSG17____ and complies with the constraints and limitations contained therein, the staff of the Department believes the project will operate within all State and Federal air and water pollution control laws and standards and will protect health and welfare. Therefore, the staff of the Board has preliminarily decided, based on available information, to recommend to the Board that coverage be issued containing numerous regulatory constraints specifically stated in General Permit MSG17____. However, before proceeding further with the staff evaluation, public comments are being solicited. The staff recommendation to the Board, as well as the Board decision, will be made only after a thorough consideration of all public comments.

Persons wishing to comment upon or object to the proposed determinations are invited to submit comments in writing to Chief, Environmental Permits Division at the above Permit Board address no later than fourteen (14) days from the date of publication of this notice. All comments received by that date will be considered in the formulation of final determinations regarding the application. A public hearing will be held if the Permit Board finds a significant degree of public interest in the proposed permit. The Permit Board is limited in the scope of its analysis to environmental impact. Any comments relative to zoning or economic and social impacts are within the jurisdiction of local zoning and planning authorities and should be addressed to them.

Additional details about the application, including a copy of the permit, are available by writing or calling the Chief, Environmental Permits Division at the above Permit Board address and telephone number. This information is also available for review at the following location(s) during normal business hours.

Mississippi Department of Environmental Quality

INSPECTION SUSPENSION FORM

UNDER WET DECK LOG SPRAY WITH RECIRCULATION

GENERAL NPDES PERMIT MSG17 _____

INSTRUCTIONS

Coverage recipients under Mississippi's Wet Deck Log Spray with Recirculation General Permit may temporarily suspend required weekly inspections of erosion and sediment controls by submission of this form. Inspections may be suspended only when land disturbing activities have ceased, no further land disturbing activities are planned for a period of at least 6 months, the site is stable with no active erosion, and vegetative cover has been established. The coverage recipient is responsible for all permit conditions during the suspension period and nothing in this condition shall limit the rights of the MDEQ to take enforcement or other actions against the coverage recipient. Once land disturbing activities resume the MDEQ must be notified and all inspections and record keeping required by the permit must also resume. Color photographs, representative of the construction site, must be submitted with this form.
