

Mississippi Digital Earth Model (MDEM)

Metadata Standards

Executive Order 12906, "Coordinating Geographic Data Acquisition and Access: The National Spatial Data Infrastructure," was signed on April 11, 1994, by President William Clinton. Section 3, Development of a National Geospatial Data Clearinghouse, paragraph (b) states:

[Standardized Documentation of Data](#). Beginning 9 months from the date of this order, each agency shall document all new geospatial data it collects or produces, either directly or indirectly, using the standard under development by the FGDC, and make that standardized documentation electronically accessible to the Clearinghouse network. Within 1 year of the date of this order, agencies shall adopt a schedule, developed in consultation with the FGDC, for documenting, to the extent practicable, geospatial data previously collected or produced, either directly or indirectly, and making that data documentation electronically accessible to the Clearinghouse network.

The staff, in conjunction with the PAC and the TUG, recommends:

1. The Council adopts the Federal Geographic Data Committee (FGDC) metadata standard as a requirement for all geographic datasets to be collected as part of MDEM.
