A. Robert Thompson  
Operations Manager

## 1.0 Introduction

This report summarizes activities performed by IT Corporation, on behalf of Kuhlman Electric Corporation, to remove soil containing polychlorinated biphenyls (PCBs) placed at the AKT Gravel Pit in Crystal Springs, Mississippi. Soil removal activities were performed in accordance with methods described in the *Revised Soil Removal Work Plan* by IT Corporation dated July 24, 2001. IT Corporation provided the equipment operators, sampling technicians, site chemist, and site manager for the removal operation. Transportation and disposal services were subcontracted to qualified providers. The removal work began September 11, 2001 and was completed on October 4, 2001.

**Table of Contents**

1.0	Introduction.....	1-1
2.0	Soil Removal and Stockpiling.....	2-1
3.0	Confirmation Soil Sampling.....	3-1
4.0	Additional Soil Removal.....	4-1
5.0	Transportation and Disposal.....	5-1
6.0	Site Restoration.....	6-1

**Appendices**

- A Copies of original non-hazardous waste manifests
- B Copies of original hazardous waste manifests
- C Analytical Results

## 2.0 Soil Removal and Stockpiling

The first activity conducted at the site was to re-establish the original grid nodes and place reference markers (five-foot steel fence posts) along the edges of the work area. Using the grid nodes, markers and the map from the *Revised Soil Removal Work Plan*, the excavation lines were determined and marked on the ground using spray paint. Three colors of paint were used to mark the excavation lines. Three colors were used to track the three different soil handling types, TSCA disposal (PCBs 50 mg/kg), Subtitle D disposal (PCBs >1 to <50mg/kg) and Cut-and-Hold (PCBs <1mg/kg). Using this convention, the grid sections identified in the original plan for depths up to two feet were applied to the ground within the work area.

Three stockpile areas for removed soils were established. An unlined stockpile area for the Cut-and-Hold soil was started along the eastern edge of the excavation. Two stockpile areas lined with 8-mil polyethylene sheeting were built on level ground approximately 100 yards west of the excavation area. The lined stockpiles were built with earthen berms to prevent migration of water into or away from the stockpile in the event of rain. One stockpile was designated and marked to receive soil for TSCA disposal soil. The other was designated and marked for SubTitle D disposal soil.

Soil removal was performed with a medium-duty track-mounted excavator. A flat metal bar was welded across the teeth of the excavator bucket to enable more precise soil removal. Excavated soils were transferred to the appropriate stockpile areas using a 6 cubic yard dump truck. The excavator worked across the site in three passes, removing soils from 0 to 2 feet in the first pass, 2 to 4 feet in the second, and greater than 4 feet in the third. Following the removal of the soils from 0 to 2 feet, the excavation lines were established, with the required color identifying the soil disposal classification, for removal of soil from 2 to 4 feet. The marking process was repeated for the greater than 4 foot soil removal areas once the 2- to 4-foot soil removal was complete.

### 3.0 Confirmation Soil Sampling

Following excavation of soil from a given grid area, confirmatory soil samples were collected following the *Michigan Department of Natural Resources Guidance Document for Verification of Soil Remediation* guidelines. Soil confirmation samples were collected once the excavation reached the final grades. Confirmation samples were collected for every 45 feet of vertical exposed wall and every 500 square feet of exposed floor. Additionally, confirmatory soil samples were collected from the various stockpiles of excavated soils and soil samples were collected for the fill material locations prior to placement into previously excavated areas.

The soil samples were collected using stainless steel spoons and thoroughly homogenized in stainless steel bowls prior to being transferred to laboratory-supplied sample containers. The containers were labeled, entered on the chain-of-custody, then placed into a cooler filled with ice. Sample coolers generally were shipped via overnight carrier to Advanced Chemistry Labs, Inc. (ACL) in Atlanta, GA. However, a small number of sample coolers were shipped to Analytical Services, Inc. (ASI) in Norcross, GA for fast-turn around time analysis. At both labs, the soil samples were analyzed for PCBs according to EPA Method 8082.

Confirmation soil sample locations were marked on a field map and identified with flags in the excavation. **Figure 1** shows the locations of the confirmatory soil samples. **Table 1** presents the analytical results and provides location information for each sample. Analytical results were transmitted to the sample coordinator in IT Corporation's Alpharetta facility. Once the sample coordinator had reviewed the data quality, analytical results were communicated to the site. Of the initial 86 confirmation soil samples, 11 samples contained PCBs above 1 mg/kg, which indicated the need for additional excavation. The 11 soil samples with over 1 mg/kg PCBs contained similar concentrations to that of the grid node soil sample analytical results that initially prompted soil excavation.

#### **4.0 Additional Soil Removal and Additional Confirmation Soil Sampling**

In cases where analytical results of confirmatory samples indicated PCB concentrations in excess of 1 mg/kg, additional soil was removed in six-inch sections along the floor or walls over the entire area represented by the sample (500 sf for a floor sample, 45 linear feet of wall). Following this additional soil removal, another confirmation sample was collected along the new floor or wall position in a similar orientation as the original confirmation sample. Following the original confirmation sample designation with the letter "a" identified the "re-dig" confirmation samples (e.g. KC081 was resampled as KC081a). Based on analytical results of the confirmation samples collected from the re-dig areas, the PCB concentration detected along the walls and floors of the excavated areas were reduced to less than 1 mg/kg.

## **5.0 Transportation and Disposal**

A second track-mounted excavator was used to load the stockpiled soils onto dump trucks. The quantity of Subtitle D soil was 2,850.72 tons. This soil was transported to the Clearview Landfill in Lake, MS for disposal. Copies of the original non-hazardous waste manifests associated with these soils are included in **Appendix A**. The quantity of TSCA soil was 1,162.65 tons. This soil was transported to the Chemical Waste Management, Inc. facility in Emelle, Alabama for disposal. Carbon copies of the original hazardous waste manifests associated with these soils are included in **Appendix B**.

## **6.0 Site Restoration**

Once all of the confirmation soil sample analytical results indicated that the sidewall and floor of a given grid section was below 1 mg/kg PCB, it was considered cleared for backfilling. Backfill materials were identified in a near-by area. Analytical results for composite soil samples collected from the backfill material area found PCB concentrations below laboratory reporting limits. A track-mounted excavator was used to load the backfill soil into the 6-yard dump truck already in use at the site and, for one day, a tandem-axle dump truck for transport to the excavation area. A small dozer was used to place the backfill material into the excavation. The excavated areas were backfilled to original grade. The fencing materials and grid markers were removed from the site. Rye grass seed was placed onto the backfill and other disturbed areas of the site and subsequently covered with hay. The site roads used during the removal project were graded and dressed with locally available gravel.

**TABLE**

**CERTIFICATE OF DISPOSAL**

Chemical Waste Management, Inc. (ALD000622464) has received PCB material from:

**KUHLMAN ELECTRIC CO**

described on Alabama Hazardous Waste Manifest Number CWMA 0000918360-1

Waste Management, Inc. hereby certifies that the above described material (excluding PCB liquids, if applicable) was landfilled on the dates shown below, in compliance with State and Federal Regulations.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or representation (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained in or accompanying this document is true, accurate and complete. As to the identified section(s) of this document for which I cannot personally verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete.

**CERTIFICATE OF DISPOSAL**

Chemical Waste Management, Inc. (ALD000622464) has received PCB material from:  
KUHLMAN ELECTRIC CO

described on Alabama Hazardous Waste Manifest Number CWMA 0000918365-1  
Waste Management, Inc. hereby certifies that the above described material (excluding PCB liquids, if applicable) was  
landfilled on the dates shown below, in compliance with State and Federal Regulations.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or  
representation (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained in or accompanying this  
document is true, accurate and complete. As to the identified section(s) of this document for which I cannot personally  
verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting  
under my direct instructions, made the verification that this information is true, accurate and complete.

**CERTIFICATE OF DISPOSAL**

Chemical Waste Management, Inc. (ALD000622464) has received PCB material from:

**KUHLMAN ELECTRIC CO**

described on Alabama Hazardous Waste Manifest Number CWMA 0000918370-1

Waste Management, Inc. hereby certifies that the above described material (excluding PCB liquids, if applicable) was landfilled on the dates shown below, in compliance with State and Federal Regulations.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or representation (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained in or accompanying this document is true, accurate and complete. As to the identified section(s) of this document for which I cannot personally verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete.

**CERTIFICATE OF DISPOSAL**

Chemical Waste Management, Inc. (ALD000622464) has received PCB material from:  
**KUHLMAN ELECTRIC CO**

described on Alabama Hazardous Waste Manifest Number CWMA 0000918375-1

Waste Management, Inc. hereby certifies that the above described material (excluding PCB liquids, if applicable) was landfilled on the dates shown below, in compliance with State and Federal Regulations.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or representation (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained in or accompanying this document is true, accurate and complete. As to the identified section(s) of this document for which I cannot personally verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete.

GENERATOR'S CERTIFICATION: I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, and are classified, packaged, marked and labeled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations.  If I am a large quantity generator, I certify that I have a program in place to reduce the volume and toxicity of waste generated to the degree I have determined to be economically practicable and that I have selected the practicable method of treatment, storage, or disposal currently available to me which minimizes the present and future threat to human health and the environment. OR, if I am a small quantity generator, I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford.

**CERTIFICATE OF DISPOSAL**

Chemical Waste Management, Inc. (ALD000622464) has received PCB material from:  
 KUHLMAN ELECTRIC CO

described on Alabama Hazardous Waste Manifest Number CWMA 0000918391-1

Waste Management, Inc. hereby certifies that the above described material (excluding PCB liquids, if applicable) was landfilled on the dates shown below, in compliance with State and Federal Regulations.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or representation (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained in or accompanying this document is true, accurate and complete. As to the identified section(s) of this document for which I cannot personally verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete.

**CERTIFICATE OF DISPOSAL**

Chemical Waste Management, Inc. (ALD000622464) has received PCB material from:

**KUHLMAN ELECTRIC CO**

described on Alabama Hazardous Waste Manifest Number CWMA 0000918406-1

Waste Management, Inc. hereby certifies that the above described material (excluding PCB liquids, if applicable) was landfilled on the dates shown below, in compliance with State and Federal Regulations.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or representation (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained in or accompanying this document is true, accurate and complete. As to the identified section(s) of this document for which I cannot personally verify truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete.

### Commercial Laboratory Stipulation

**Laboratory:** Advanced Chemistry Labs, Inc.

**Accreditor:** State of Florida, Department of Health  
Bureau of Laboratories  
(NELAC Accredited State Agency)

**Accreditation ID:** E87212

**Scope:** Clean Water Act (CWA)  
Resource Conservation and Recovery Act (RCRA)

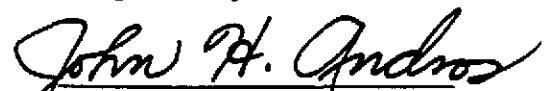

**Effective:** July 1, 2001

**Expiration:** June 30, 2002

As per Georgia EPD Rules and regulations, Advanced Chemistry Labs, Inc. is approved (Chapter 391-3-26) by Florida DOH (a NELAC approved State Agency) as of July 1, 2001. If you have any further questions concerning this matter, please contact:

**John H. Andros (Laboratory Manager) 770-409-1444 or  
Earnest U. Earn (GA EPD Coordinator) 404-675-1606**

Respectfully Submitted,

  
John H. Andros

### Commercial Laboratory Stipulation

**Laboratory:** Advanced Chemistry Labs, Inc.

**Accreditor:** State of Florida, Department of Health  
Bureau of Laboratories  
(NELAC Accredited State Agency)

**Accreditation ID:** E87212

**Scope:** Clean Water Act (CWA)  
Resource Conservation and Recovery Act (RCRA)

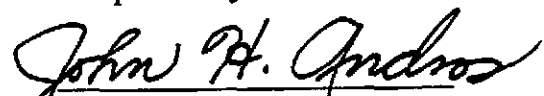

**Effective:** July 1, 2001

**Expiration:** June 30, 2002

As per Georgia EPD Rules and regulations, Advanced Chemistry Labs, Inc. is approved (Chapter 391-3-26) by Florida DOH (a NELAC approved State Agency) as of July 1, 2001. If you have any further questions concerning this matter, please contact:

**John H. Andros (Laboratory Manager) 770-409-1444 or  
Earnest U. Earn (GA EPD Coordinator) 404-675-1606**

Respectfully Submitted,

  
John H. Andros

### Commercial Laboratory Stipulation

**Laboratory:** Advanced Chemistry Labs, Inc.

**Accreditor:** State of Florida, Department of Health  
Bureau of Laboratories  
(NELAC Accredited State Agency)

**Accreditation ID:** E87212

**Scope:** Clean Water Act (CWA)  
Resource Conservation and Recovery Act (RCRA)

**Effective:** July 1, 2001

**Expiration:** June 30, 2002

As per Georgia EPD Rules and regulations, Advanced Chemistry Labs, Inc. is approved (Chapter 391-3-26) by Florida DOH (a NELAC approved State Agency) as of July 1, 2001. If you have any further questions concerning this matter, please contact:

**John H. Andros (Laboratory Manager) 770-409-1444 or  
Earnest U. Earn (GA EPD Coordinator) 404-675-1606**

Respectfully Submitted,

  
John H. Andros

## Chemical Analytical Data sampled 9/20/01 Review Checklist

Report Type:  Preliminary  Final      Date Received: 10/1/01      Project Number: 820327

Project Name: Kuhlman Excavation      Analysis/Method: 8082

Laboratory: ACL      Lab Project/Case Number: 36770

Sample Number(s): KC067 through KC083, KC017a, KC020a

Evaluated By: Betsy McDaniel      Date Evaluated: 10/2/01

Data Package Deliverables Requirement:  Minimum       Standard       Maximum

### Commercial Laboratory Stipulation

**Laboratory:** Advanced Chemistry Labs, Inc.

**Accreditor:** State of Florida, Department of Health  
Bureau of Laboratories  
(NELAC Accredited State Agency)

**Accreditation ID:** E87212

**Scope:** Clean Water Act (CWA)  
Resource Conservation and Recovery Act (RCRA)

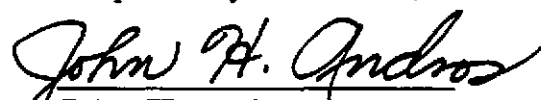

**Effective:** July 1, 2001

**Expiration:** June 30, 2002

As per Georgia EPD Rules and regulations, Advanced Chemistry Labs, Inc. is approved (Chapter 391-3-26) by Florida DOH (a NELAC approved State Agency) as of July 1, 2001. If you have any further questions concerning this matter, please contact:

**John H. Andros (Laboratory Manager) 770-409-1444 or  
Earnest U. Earn (GA EPD Coordinator) 404-675-1606**

Respectfully Submitted,

  
John H. Andros

October 1, 2001

Case Narrative ASI Sample 144545

Six solid samples were collected on September 26, 2001 and arrived at ASI on September 27, 2001. The samples were logged into our LIMS system as ASI sample #144545 for analysis of PCBs. Upon arrival at ASI, the temperature of the samples was above compliance level. All other conditions for proper *sample receipt* were met. All holding times and analysis times were met.

In batch 72147, the samples were analyzed for PCBs using EPA method 8082. The LCS was below acceptance limits (2 standard deviations) but within control limits (3 standard deviations). All other measurement quality objectives were met for batch 72147.

Respectfully yours,

Amanda M. Cook

### Commercial Laboratory Stipulation

**Laboratory:** Advanced Chemistry Labs, Inc.

**Accreditor:** State of Florida, Department of Health  
Bureau of Laboratories  
(NELAC Accredited State Agency)

**Accreditation ID:** E87212

**Scope:** Clean Water Act (CWA)  
Resource Conservation and Recovery Act (RCRA)

**Effective:** July 1, 2001

**Expiration:** June 30, 2002

As per Georgia EPD Rules and regulations, Advanced Chemistry Labs, Inc. is approved (Chapter 391-3-26) by Florida DOH (a NELAC approved State Agency) as of July 1, 2001. If you have any further questions concerning this matter, please contact:

**John H. Andros (Laboratory Manager) 770-409-1444 or  
Earnest U. Earn (GA EPD Coordinator) 404-675-1606**

Respectfully Submitted,

  
John H. Andros
