Mr. W. C. Fore
W.C. Fore Trucking, Inc.
PO Box 3058
Gulfport, Mississippi 39505

Dear Mr. Fore :

Re: W C Fore Trucking, Inc., Menge Avenue Pit
Harrison County
General Mining Stormwater Coverage. No. MSR320296

Enclosed is a Certificate of Coverage granting you coverage under the Mining Storm Water General NPDES permit, copy enclosed. The Storm Water Mining General Permit was reissued on October 1, 2007, by the Permit Board on Environmental Quality. There are several significant changes in the new permit which are summarized on the attached addendum. This is a summary and does not negate the need for the coverage recipient to carefully read and be familiar with the permit and its conditions. In addition, several forms that were part of the previous permit and required for submittals and recordkeeping, are now enclosed in a separate document called the "Mining General Permit Forms Package."

The submitted Storm Water Pollution Prevention Plan (SWPPP) appears to meet permit requirements and will be further reviewed during compliance inspections.

This permit coverage is issued in accordance with the provisions of the Mississippi Air and Water Pollution Control Law (Sections 49-17-1, et seq., Mississippi code of 1972), and the regulations and standards adopted and promulgated thereunder and under the authority granted to the Mississippi Environmental Quality Permit Board pursuant to Section 402(b) of the Federal Water Pollution Control Act. Any appeal of this action must be made within the 30-day period provided for in Section 49-17-29(4)(b) Mississippi code of 1972.

Sincerely,

Jim Morris, Chief
General Permits Branch

RE-COVERAGE FORM

MINING STORM WATER, DEWATERING AND NO DISCHARGE GENERAL PERMIT

GENERAL PERMIT: MSR320296 . This coverage number must be completed for the referenced mining activity or this form will be considered incomplete and will be returned. The coverage number can be found at the bottom left corner of your previous Certificate of Coverage.

The submittal of this form is required to receive coverage under the reissued Mining Storm Water, Dewatering and No Discharge General Permit. This form must be completed and returned to MDEQ at the address printed at the bottom of this form within 30 days of the date of the Letter of Instruction for Re-Coverage.

Please indicate the activities to be covered by this Re-Coverage Form (check all that apply).

- Storm Water Discharges Associated with Mining
- Mine Dewatering
- Wastewater Recirculation System with No Discharge

The appropriate section of this form must be completed if the applicant proposes to operate a wastewater recirculation system with no discharge and/or discharge impounded mine water (dewatering).

Facilities that operate wastewater recirculation systems with no discharge under a valid "No Discharge" State Operating Permit can check the appropriate box above to request coverage for these operations under the Mining Storm Water, Dewatering and No Discharge General Permit. MDEQ will then terminate the existing "No Discharge" State Operating Permit and will extend coverage to these operations for an additional five years (until 2012) under the Mining Storm Water, Dewatering and No Discharge General Permit. Facilities discharging mine dewatering under a valid National Pollutant Discharge Elimination System (NPDES) Permit can follow the same procedure to request coverage under the Mining Storm Water, Dewatering and No Discharge General Permit.

ALL INFORMATION MUST BE COMPLETED (indicate "N/A" where not applicable)

RE: Dedeaux Pit

On April 4, 2006 I inspected the Dedeaux Pit (W.C. Fore P87-027) in Harrison County. This was a 28 acre open pit mine for fill material. All Storm water is contained on site within the pit. Only a few acres of this permit were ever mined. The mined area is now being backfilled with tree debris. Vegetation is very poor. There is no office, scales, plant, etc. at this location.

Dear Mr. Fore:

Re: Storm Water Permit Coverage
MSR320296
Menge Avenue Pit
Gulfport, Harrison County

On July 28, 1993 our office issued coverage MSR320296 under Mississippi's Mining General NPDES Storm Water Permit for the referenced surface mine. According to our files, the required semi-annual inspection reports have never been submitted or are no longer being submitted. Enclosed is a copy of the report form.

If referenced mining is complete with final ground cover and erosion controls, or if the proposed mining was cancelled or delayed, please let us know in writing no later than November 30, 1995. Otherwise a semi-annual report, using a photocopy of the enclosed form, should be submitted to avoid possible enforcement.

We appreciate your attention to the storm water regulations. If you have any questions, please call me at 961-5074 or Mr. Nameh Salem at 961-5234.

P. O. Box 3058
Gulfport, Mississippi 39505

Dear Mr. Fore:

Re: Mining Storm Water General NPDES Permit
Coverage Numbers MSR320293 thru MSR320296

Enclosed are four Certificate of Coverages granting you coverage under the Mining Storm Water General NPDES Permit, copies enclosed. Your Storm Water Pollution Prevention Plan (SWPPP) appears to meet permit requirements and will be further reviewed during our compliance inspection. You or your operator must be in compliance with the plan by October 1, 1993. The last page of the permit is an inspection form which should be copied and used for the monthly inspections. The first inspections should be done the month mining begins. The first semi annual reports are due in our office by January 28, 1994. Monthly inspections must continue for two months beyond completion of mining and satisfactory reclamation work, after which permit coverage will terminate.

These permit coverages are issued in accordance with the provisions of the Mississippi Air and Water Pollution Control Law (Sections 49-17-1, et seq., Mississippi Code of 1972), and the regulations and standards adopted and promulgated thereunder, and under the authority granted to the Mississippi Environmental Quality Permit Board pursuant to Section 402(b) of the Federal Water Pollution Control Act.

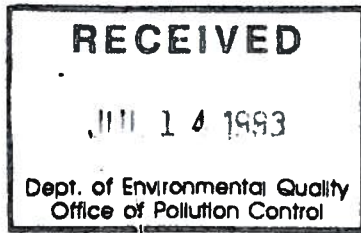

Any appeal of these actions must be made within the 30 day period provided for in Section 49-17-29(4)(b) Mississippi Code of 1972.

Sincerely,

Jerry W. Cain, P.E., Chief

STORM WATER POLLUTION PREVENTION PLAN

FOR

SURFACE MINING

JULY 1993

INTRODUCTION

This document is the Storm Water Pollution Prevention Plan of W. C. Fore Trucking, Inc. The plan is the criteria for compliance with regulations set by the Environmental Protection Agency, 40 CFR, Parts 122, 123, and 124, National Pollutant Discharge Elimination System Permit Application Regulations for Storm Water Discharges regarding the Construction Storm Water.

The purpose of this Storm Water Pollution Prevention Plan is for the control and mitigation of pollution to storm water discharges associated with surface mining operations.

It is the intent of W. C. Fore Trucking, Inc. to comply with the minimum permit requirements set forth by the Environmental Protection Agency, which are as follows;

1. Procedures to maintain erosion and sediment controls.
2. Provisions to inspect all erosion controls at least once a month and after a two year 24 hour storm event.
3. Safeguards to prevent pollution from equipment maintenance and or fueling.
4. Provisions for monitoring rainfall amounts as to comply with all inspection requirements.

MENGE AVENUE PIT

STORM WATER POLLUTION PREVENTION PLAN

Our MENGE AVENUE PIT MINE is located in the southwest quarter of section 13, township 7 south, range 13 west, in Harrison County, Ms.

The permitted area is 28 acres. There is no sediment leaving this mining area whatsoever. The material at the bottom of the mined area is a coarse free draining sand, and for the most part is totally dry.

I. PROCEDURES TO MAINTAIN EROSION AND SEDIMENT CONTROL

Due to the nature of the material at the bottom of the mined area and the confinements of the mined area, there is no other procedures necessary to maintain sediment control. However, periodic checks shall be made to assure that no changes occur.

II. INSPECTION OF THE EROSION AND SEDIMENT CONTROL SYSTEM

At least once a month and after a two year 24 hour storm event, the erosion and sediment control system shall be inspected. The designated inspector shall make notes in an inspection log of the

condition of the sediment control system. After inspection he shall inform the proper field personell of what improvements, if any, need to be made.

III. SAFEGUARDS TO PREVENT POLLUTION FROM EQUIPMENT MAINTENAN

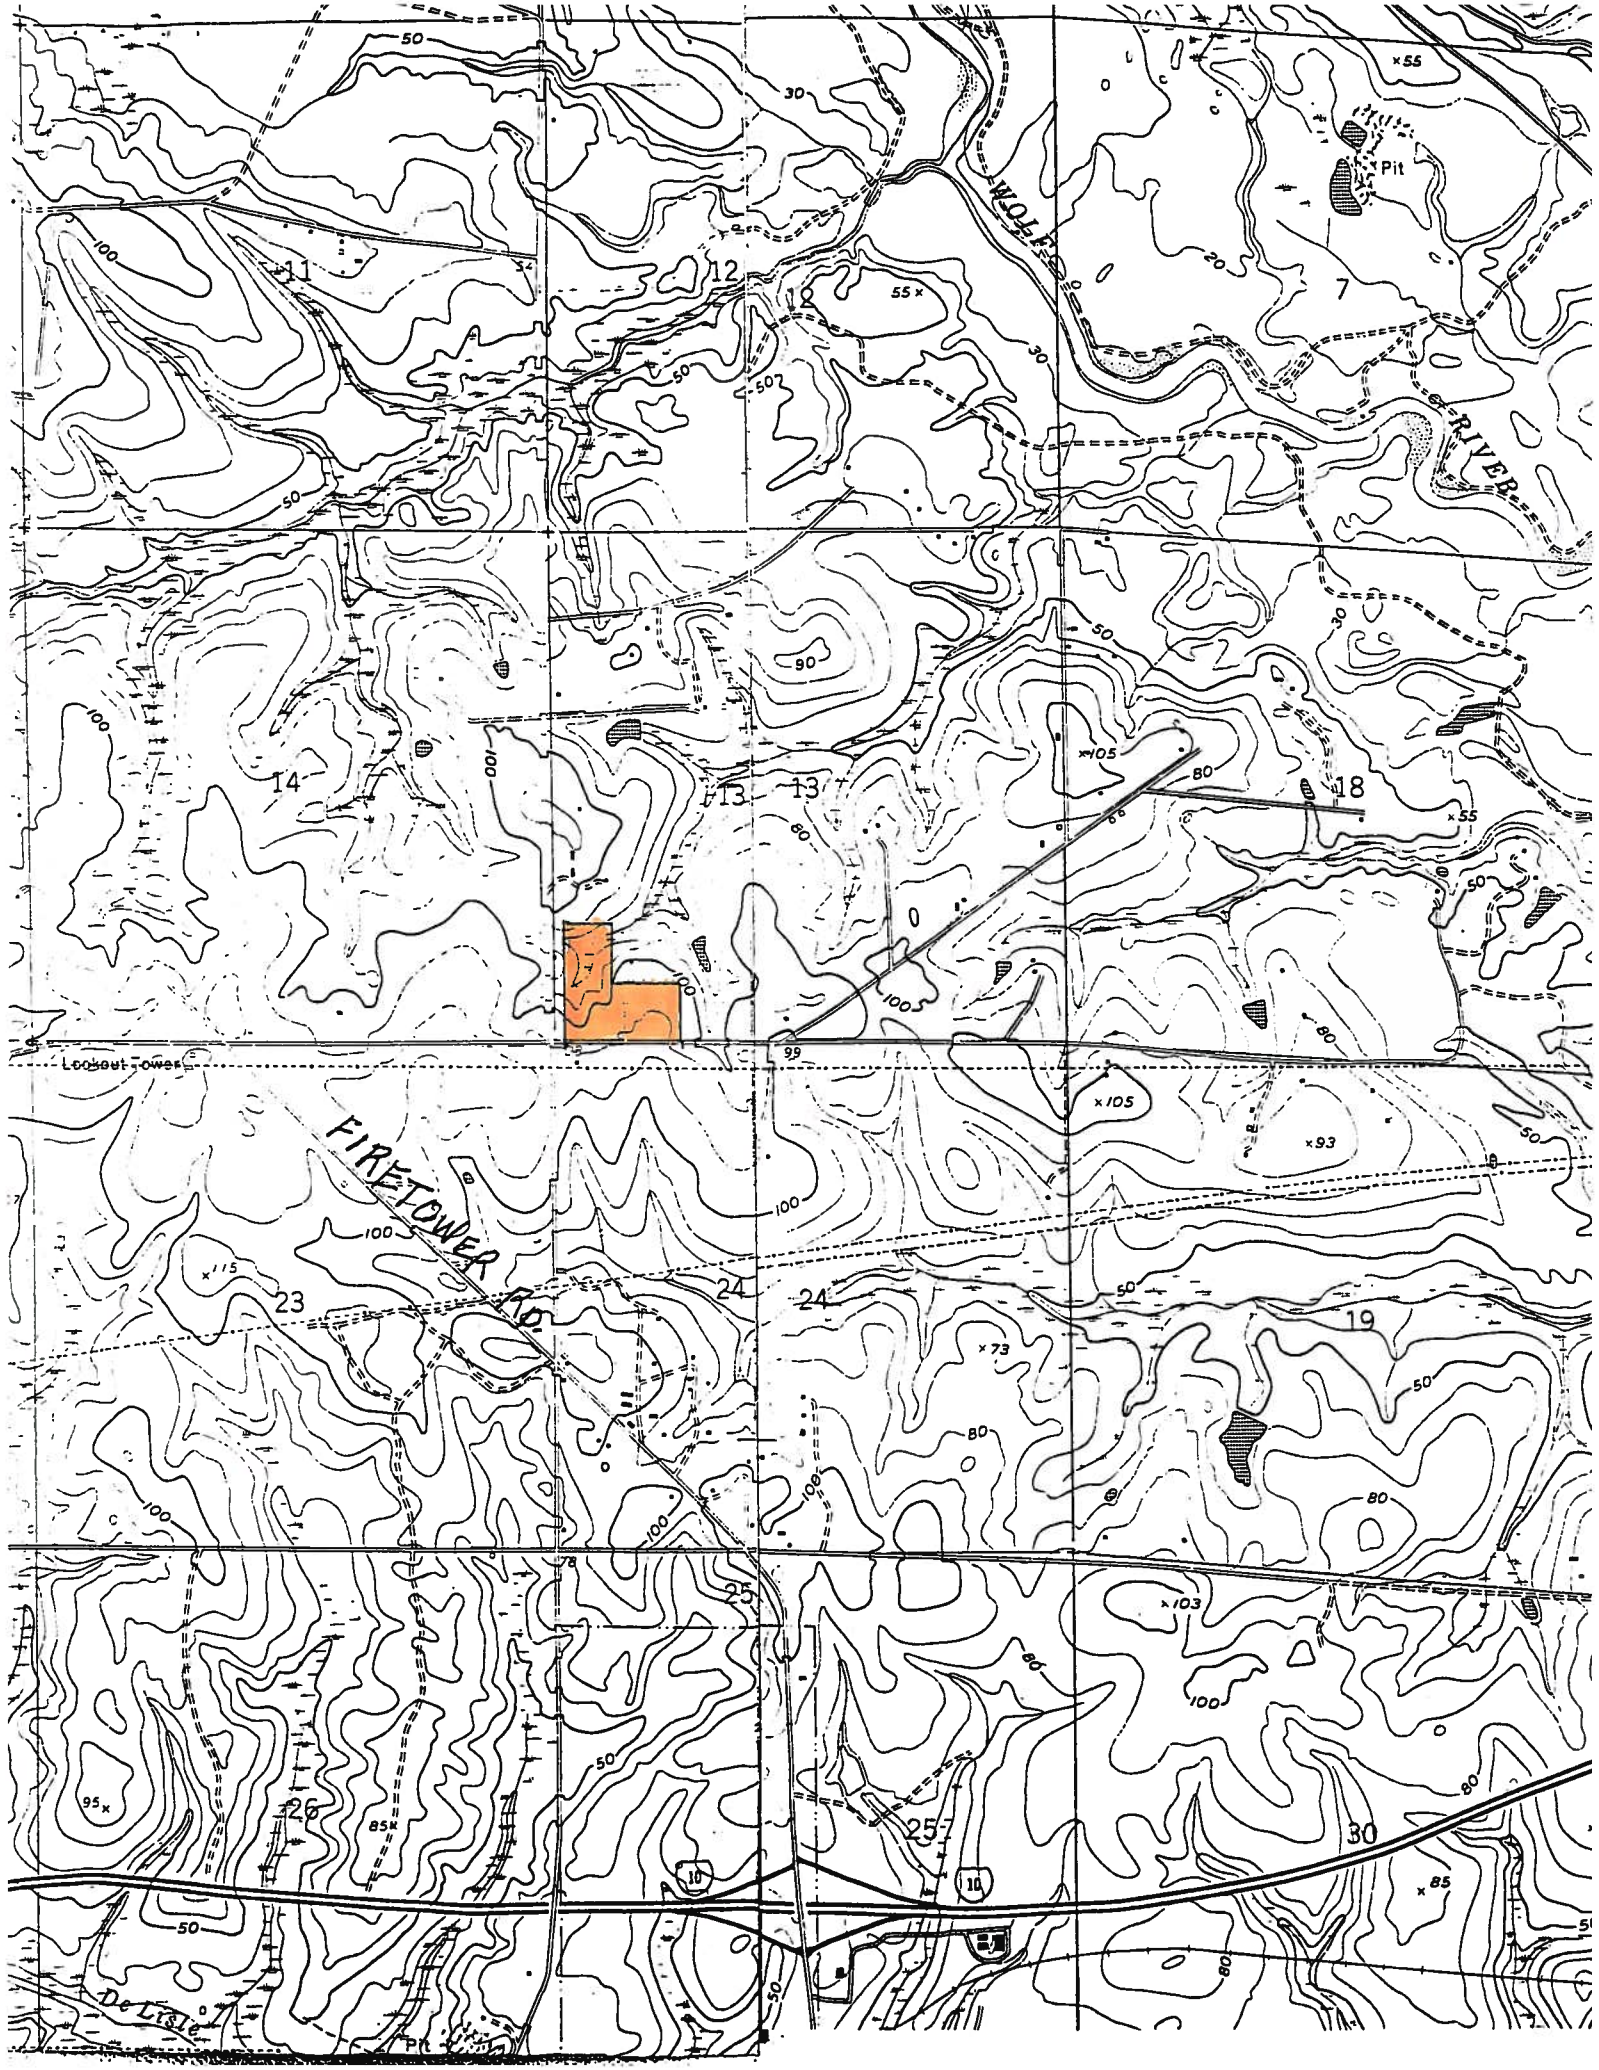

Equipment maintenance inside of the pit area is prohibited.

All employees shall be notified of this. Fueling of equipment shall be done with automatic shutoff nozzles to avoid spillage.

IV. MONITORING RAINFALL

A rain guage shall be installed at the pit. It shall be read on a regualr basis after each significant rainfall. The readings shall be recorded in a rain guage log and kept for future rference.

All records resulting from the activities of this permit shall be retained for a period of three years of the date of the inspection or report.

Mississippi Department of Natural Resources Bureau of Geology Mining and Reclamation Section

SURFACE MINING PERMIT

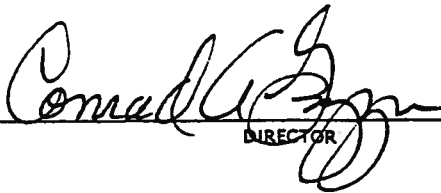

This Certifies That

W. C. FORE TRUCKING, Inc.
P. O. Box 3058
Gulfport, Mississippi 39505

has been granted permission to conduct a Class II surface mining operation for 28 acres of fill dirt in Harrison County in the State of Mississippi at a location described in the application referred to below. The application and other data submitted to the Bureau of Geology are filed with and considered as part of this permit. The permittee is obligated to follow the plans for mining and reclamation as stated in the application and to comply with any other conditions set forth herein. This permit is valid for a period of five years from date of issue and is subject to all applicable laws, rules and regulations. The Bureau of Geology reserves the right to suspend or revoke this permit at such time the holder is determined to be in violation of any of these conditions.

Issued pursuant to the Mississippi Surface Mining and Reclamation Act (Section 53-7-1 et seq., Mississippi Code of 1972) this 22nd day of July, 1987.

STORMWATER PREVENTION PLAN

THE EXCAVATION IN THIS DIRT PIT IS TOTALLY CONTAINED. THERE IS NO ALLOWANCE FOR SURFACE DRAINAGE OUTSIDE OF THIS PIT.

THE MATERIAL IN THE BOTTOM OF THIS EXCAVATION CONSISTS OF A COARSE GRANULAR, FREE DRAINING SAND. THIS ALLOWS FOR THE RAIN WATER THAT FALLS INSIDE THE PIT TO DRAIN DOWN THROUGH THE SURFACE OF THE GROUND.
